

## Animal Nutrition

# FROM BOTANICAL SEED TO BENEFICIAL FEED

We take on the challenge of producing effective, natural-based products for animal nutrition. Our experts are familiar with the needs of the pet food, aqua culture and livestock industries and work with you to identify botanical raw materials optimised for your application and formulation. Secondary plant compounds occur in a wide variety and can be enriched and standardized through different processing and extraction methods with our know-how.

### **BOTANICAL EXTRACTS, TINCTURES AND POWDERS FOR ANIMAL NUTRITION**

We offer a wide range of botanicals in various formats, which can add different values to animal feed. Whether with a functional, sensory or technical benefit, our botanicals make a positive contribution in every feed on a natural and sustainable basis.
